Computer Aided Design

Index to Volume 4 Numbers 1-5 pages 1-292

A

AAG group – Automated artwork generation group 118
ADE design drawing office, some lessons learned 28
Adjoint network concept in frequency domain analysis and optimization 129
AEDCAP, circuit simulation 154, 144
Aerofoil design 36
AIDS – piping isometrics system 265
Air conditioning control 211
Air conditioning by computer 203
Analysis of field distribution: rectangular geometries 155
Analysis, structural. NASTRAN – a finite element program 172
Analysis and optimization, some applications of the adjoint network concept in frequency domain 129
Analysis of pipelines 269
Analysis of soil settling 213
Applications of the adjoint network concept in frequency domain analysis and optimization 129
Applications of computer aided design techniques to glassware and mould design 57
Applications packages 23

Building, computer aids 102
Building, heating of 271

C

Cabinet design for electronic equipment 51
Cabling system design 113
C.a.d. – CADMAC-11 interactive system 239
C.a.d. of closed-loop control systems 120
C.a.d. of field distribution: rectangular geometries 155
C.a.d. group 264
C.a.d. of nuclear reactor shielding 107
C.a.d. solutions for laminar-flow heat transfer 79
CAD Centre packages: MEDALS 46, 222; ENGLIB 152, 220; GINO, VINO, THINGS, HIDDEN LINES and GRESCALES 291
CAD Centre Scene 46, 102, 152, 220, 291
CADMAC graphics 208
CADMAC system 67
CAPICS, processing of industrial cabling systems 113
Car body design at Pininfarina 35
Cartography, computer programs for 209
Cartography by computer 262
Catalogue, description of programs 266
Chairman's address, IEE 141
Circuit analysis programs for thermal design of cabinets for electronic equipment 51
Circuit analysis programs 144
Circuit design for undergraduates, course in computer aided electronic design 135
Circuit simulation, AEDCAP 143, 144
Civil engineering programs 212
Closed-loop control system design 120
Common formats in automated artwork generation 118
Complex method of function minimization 71

Computer aided circuit design for undergraduates, a course 135
Computer aided design techniques to glassware and mould design, application of 57
Computer aided electronic circuit design for undergraduates, course in 135
Computer-aided solution of differential equations using d.d.a. simulations 160
Computer application packages and the engineer 23
Computer design, advances in 205
Computer graphics 57
Computer, isometric drawing with 3
Computer program user reports 36
Computer switch 143
Computers, health buildings and systems, cybernetics of 16

Conferences

Curved surfaces in engineering, England 185
IEE International conference on Computer Aided Design, England 188
International Symposium on Circuit Theory, London 86
International Symposium on Computers in Optimization of Structural Design, UK 138
Online '72 – International Symposium on Online Interactive Computing, England 272
Software '72 – Conference and Exhibition, England 278
SSCT 71 Summer School on Circuit Theory, Czechoslovakia 90
USCOMP '72 Conference and Exhibition London 196

Contouring routines for dose-rate calculations 107
Control system, closed-loop design 120
Control system design using the inverse Nyquist array 222
Convergent optimizers 71
Cornu spiral 179
Course in computer aided electronic circuit design for undergraduates 135
Cubic spline package, Part 1 228
CUBITH system 16
Curvature profiles for plane curves 176
Curve and surface design 10
Cut-and-fill program 270
Cybernetics and systems 16

D

D.d.a. simulations to solve differential equations 160
Design of aerofoils 36
Design of cabinets for electronic equipment by means of circuit analysis programs 51
Design drawing office, ADE for, some lessons learned 28
Design of electron microscopes 37
Design of industrial cabling systems 113
Design of multivariable systems using the inverse Nyquist array 222
Design of sewage tanks 270
Design software system, AED 144
Design systems, the interactive languages Multipatch and Multiboject 10
DIANA program for water distribution 35
Differential equations solved using d.d.a. simulations 160
Digital hardware, the testability of 169
Digitizers for ship design 36
Digitizing and drafting 39
Digitizing table 67
Dimple Haig bottle 64
Diode circuit design – IMPATT 94
Display system 212
DISSPLA, display system 212
Drafting and computers 46
Drawing isometrics with the computer 3

E

Earthworks program 261, 270
ECAP package, enhancements of 42
ECAP program 54
Education and training, light pen 154
EEC Commission 263
ELAS finite element program 267
Electron microscope design 37
Electronic circuit design for undergraduates, a course 135
Electronic circuit simulator 143
Electronic equipment design by means of circuit analysis programs, thermal design of cabinets for 51
ENCORE package, strategy model 270
ENGLIB, program library 152

Equipment

Analogue data display 217
Artwork generation systems 215
Artwork generator systems 148
Card edge connector 148
Card reader 288
Card storage trays 218
Circuit analyser 145
COM 96
COM machines 214
Controllers 290
Data transmission 147
Digitizing table 43
Digitizers 287
Disc memory 145
Disc systems 288
Drum drafting system 44
Drum memories 148
Electrostatic page printer 217
Film analyser 288
Flatbed drafting systems 287
Flatbed plotter 44
Graph plotter 146
Instrumentation recorder 290
Interfaces 146
Mangetic tapes 145, 147
Microcircuits 149
Microdensitometer systems 216
Microfiche 146
Minicomputer 148, 289
Minicomputer usage 145
Numerical control systems 289
Optical character reader 96
Paper tape preparation systems 287
Paper tape reader 218
Paper tape winder 289
Peripheral controller 149
Printer 149
Printers-plotters 215
Programmable display system 43
Sockets 217
Tape decks 289
Test system 148
Thermal printer 149
Transistor testing 215
V.d.u. systems 290
V.d.u. terminal 96, 97, 147, 214
Wire-wrapping contacts 146
xy plotters 43, 216
xy recorders 145, 290

Equipment design by means of circuit analysis programs, thermal design of cabinets 41

F

FACTEST, plant costing program 211
Ferranti ADE digitizer 28
Field distribution, computer aided analysis of 155
Finite element program, ELAS 267
Finite element program for structural analysis, NASTRAN 172
Flowcharting by graphics 165
Frequency domain analysis and optimization using the adjoint network concept 129
Function minimization 71
Function minimization – complex method 71

G

Gauss-Siedel iteration in heat-transfer problems 79
Generation of common formats in artwork 118
Genesys centre 208
Glassware and mould design 57
Graphics for flowcharting 165
GREYSCALES technique 62

H

Health buildings 16
Heat exchanger design 98, 271
Heat exchanger systems 79
Heath, F. G., IEE inaugural lecture 205
Heating and ventilation 211
Heating loads by computer 203
Highway design programs 261
House design, SRC grant 94

I

IEE Chairman's address 141
IMPATT, diode circuit design 94
Improved 'complex' method of function minimization 71
Inaugural lecture, computer design advances 205
Industrial cabling system design by computer 113
Interactive c.a.d. system 67
Interactive c.a.d. system design – CADMAC 11 239
Interactive graphics 107, 120, 206
Interactive graphics, flowcharting by 165
Interactive languages 10
Interactive solutions in c.a.d. for laminar-flow heat transfer 79
Inverse Nyquist array in multivariable systems design 222
Isometric drawing 3
Iterative solutions in c.a.d. for laminar flowchart heat transfer 79

L

Laminar flow heat transfer 79
Land surveying 271
Languages of Multipatch and Multiobject design systems 10
Light pen 48, 50, 106, 154, 260
Lloyd's register 173
London centre, CADC 220

M

Mapping by computer 262
Maps by computer 209
Menu commands for CADMAC-11 243
Modular graphics 291
MOS i.c. design package 143
Multi-layer p.c.b.s. 118
Multi-loop systems 120
Multipatch 61
Multipatch, Multiobject 10
Multivariable control system design using the inverse Nyquist array 222

N

NASTRAN – structural analysis program 172
NEWSCOMP, typesetting system 264
Nuclear reactor shielding, design of 107
Numerical control 212
Numerical Master Geometry (NMG) 61
Nyquist array, use of inverse in multivariable control system design 222
Nyquist diagram 120

O

Online '72 206, 279
Optimization 129
Optimization for unconstrained object functions 247
Optimization research 142

P

Parameter optimization for unconstrained object functions – a bibliography 247
PEST – task assignment 213
Pininfarina car-body design 35
Piping isometrics 142, 144, 264, 265
Pipeline analysis 269
Piping package sales – RAPID 34
Piping systems 3
Plane curves – curvature profile 176
Plant costing program 211
PRESBEAM – program for concrete beams 42
Printed circuit design 37
Privacy 263
Process plant design – FLOWPACK 38
Processing of industrial cabling systems – CAPICS 113
Profiles for plane curves 176
Program catalogue, description of 266
Program for structural analysis – NASTRAN 172
Program – PRESBEAM for concrete beams 42
Program responsibility, Light pen 48
Programs – ECAP package enhancements 42
Programs, thermal design of cabinets for electronic equipment by means of circuit analysis 51
Pylon design 36

Q

Quantity surveyor, program for

R

RAPID – pipe isometrics system 34, 264
Rectangular geometries, c.a.d. analysis of field distribution 155
Re-inventing the wheel, Light pen 48
Remote scientific and technical computing 35
Research work, optimization 142
Responsibility of software bureaux to the user, Light pen 50
Road design programs 261
Roll-formed components design 38

S

Sailplane design, Torva 34
Self-heating buildings 271
Sewage tank design 270
Shielding of nuclear reactors, design by computer 107
Ship design digitizers purchased 36
Simulation program – FLOWPACK 38
Simulation of wind tunnel 265
Software services 27
Soil settling programs 213
Solar radiation, effect on air conditioning 204
Solution of differential equations using d.d.a. simulations 160
Solution of field equations for i.c. Hall plates 155
Solution in c.a.d. for laminar-flow heat transfer expediting 79
Some lessons learned, ADE for design drawing office 28
Spline methods 60
Splines, cubic – a program package. Part 1 – The User's guide 228
SRC grant for house design 94
Steel structures, drawings for 144
Strategy models – ENCORE 270
Structural analysis by the NASTRAN finite element program 172
Structural design services 98
Surveys 23
Systems, cybernetics, computers and health buildings 16

T

Task assignment, PEST 213
Teaching by computer aided electronic circuit design 135
Testability of digital hardware 169
Thermal evaluation of closed cabinets 51

Titles

ADE in the Ferranti design drawing office, Some lessons learned, G. A. Shippey 28
Application of computer aided design techniques to glassware and mould design, W. B. Hart 57
CADMAC – A fully interactive computer aided design system, C. B. Besant, A. Jebb, A. J. Eagles, and P. W. Saunders 67
CADMAC-11 – A fully interactive computer aided design system, Besant, C. B., Jebb, A., Hamlyn, A., Koh, B. H., Grindley, R. E., Martin, P. and Clifford, A. 239
Computer aided analysis of field distribution: rectangular geometries, A. H. Evans and J. E. L. Hollis 155
Computer aided design of closed-loop control systems, P. Atkinson 120
Computer aided design of nuclear reactor shielding, A. J. H. Goddard, S. A. Keillor and M. F. Wrigley 107
Common formats in automated artwork generation, K. H. Chan 118
Computer aided solution of differential equations using d.d.a. simulations, B. Parasuraman 160
Computer applications packages and the engineer, F. E. Taylor 23
Course in computer aided electronic circuit design for undergraduates, A. P. Martin and J. I. Sewell 135
Cubic spline package, Part 1 – The User's guide, A. W. Nutbourne, R. B. Morris and C. M. Hollins 228
Curvature profiles for plane curves, A. W. Nutbourne, P. M. McLellan and R. M. L. Kensit 176
Expediting iterative solutions in computer aided design for laminar-flow heat transfer, V. Preiningerova 79
